

ENJOY YOUR POOL. **BLUEMATIC** DOES THE REST.

- ⚡ Heating with solar energy
- ⚡ Always perfect pool water
- ⚡ Control everything via app
- ⚡ No subscription fees

DISCOVER BLUEMATIC

WHY CHOOSE BLUEMATIC?

A pool should bring relaxation, not extra worries.

Bluematic automates and monitors your pool installation so you always enjoy perfect pool water and lower energy costs.

Check your water quality in real time, manage your installation from anywhere and let your heat pump work smartly based on the surplus production of your solar panels.

**Smart savings. More enjoyment.
That's Bluematic.**

HEAT YOUR POOL SMARTLY WITH SOLAR ENERGY

Bluematic automatically reads your smart meter and detects when your solar panels produce more energy than your home consumes. **That free solar energy is then used intelligently to heat your pool.**

Choose how you want to heat: maximum savings with pure surplus production or extra comfort with smart supplementary heating. **Bluematic manages everything fully automatically, tailored to your situation.**

"I want to maximise my savings"

OPTION 1

HEATING ONLY WITH SURPLUS PRODUCTION

- 100% surplus from solar panels
- Also ideal during pre-season
- Automatic connection via smart meter
- The more sun, the warmer your pool

"I always want to be able to swim and save"

OPTION 2

EXTRA HEATING WITH SURPLUS PRODUCTION

- Desired swimming temperature guaranteed
- Use your pool as a thermal buffer
- Automatic connection via smart meter

 - +
- Lower energy consumption
Less dependent on expensive electricity
Smart use of solar energy
Fully automatic operation
No subscription fees

Did you know?

Heating a pool accounts for a **significant portion of its energy consumption**. By smartly using excess solar energy, **you heat more efficiently and cost-effectively.**

The level of savings depends on the solar energy produced and the capacity of the heat pump.

ALWAYS IN CONTROL OF YOUR POOL

Your pool, always at your fingertips

With Bluematic, manage your entire pool installation easily via smartphone, tablet or computer. Wherever you are.

Check water quality in real time, smartly control your heat pump with solar energy and receive notifications when action is needed.

One app for your entire pool

+ ALWAYS PERFECT POOL WATER

Easily monitor temperature, pH, chlorine and redox thanks to clear indicators and smart alerts.

+ SMART ENERGY MANAGEMENT

Let your heat pump work automatically based on the surplus production of your solar panels.

+ CONTROL EVERYTHING REMOTELY

Manage lighting, circulation pump, heating and water treatment with one tap.

+ FASTER SUPPORT

Give your pool builder secure access for remote support and monitoring.
