

WI-FI CONNECTION OPERATION INSTRUCTIONS

1.Wi-Fi installation manual

Note that a Wi-Fi module is available for this heat pump. The Wi-Fi module connects to the heat pump and then allows it to be controlled from a mobile phone or a web browser over the internet. Please refer to the separate Wi-Fi installation manual for details of the Wi-Fi module and mobile app.

1.1 Download the APP

For the Android version: Search “smart life” in the Google play, download and install it.

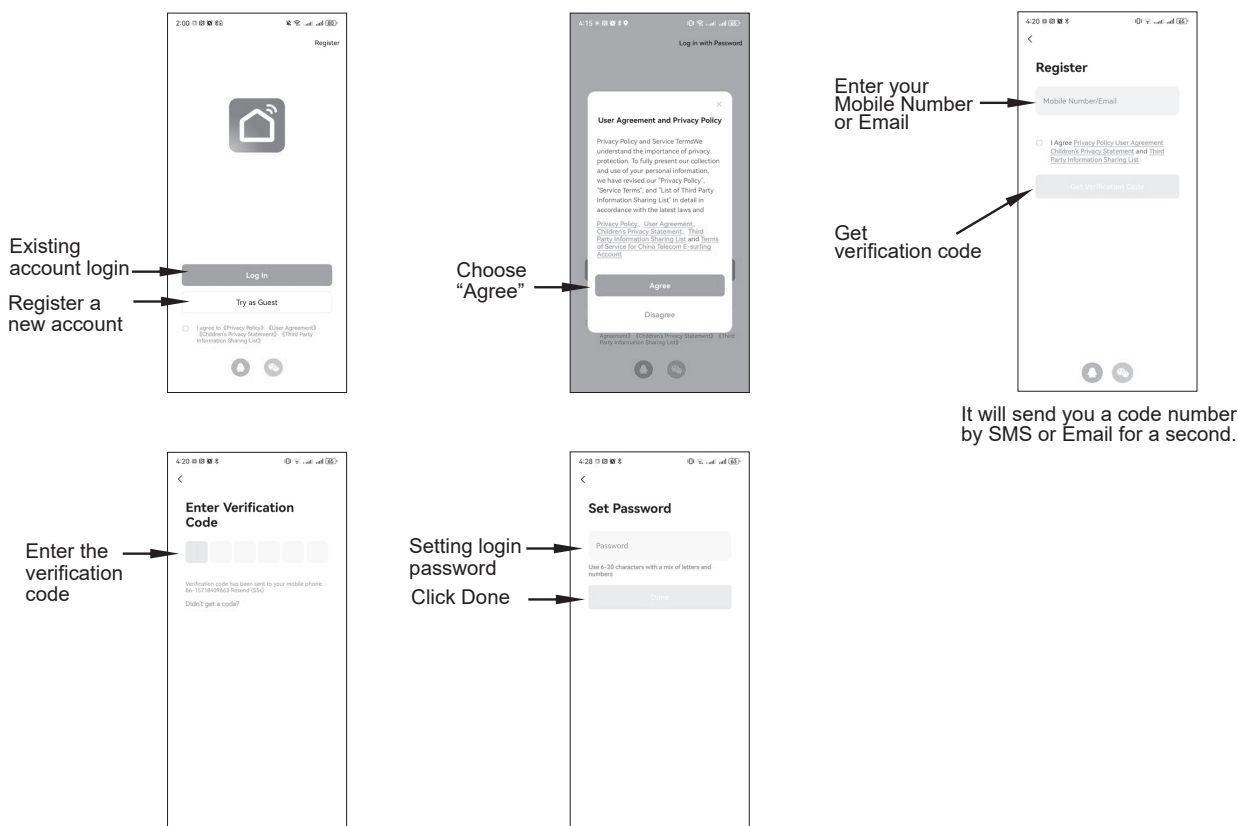

For the IOS version: Search “smart life” in the APP store, download and install it.

1.2 Register

After the APP is installed, open the APP and register an account according to the instructions. It is recommended to register with an E-mail address.

If you already have an account, you can login directly.

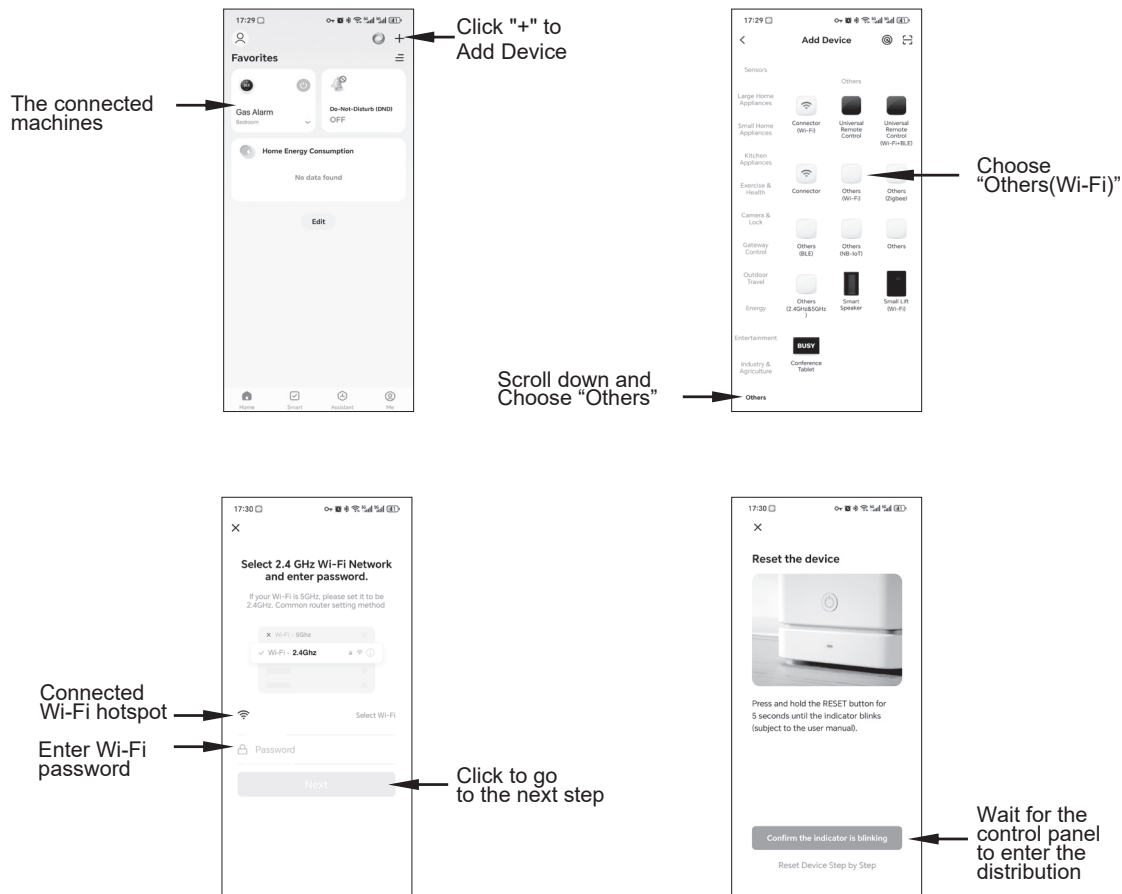

1.3 Configuration of Wi-Fi module

1. Note

- (1)The mobile phone must be connected to the wifi hotspot first .(only applicable to 2.4GHz, 5GHz temporarily cannot be connected)
- (2)The Wi-Fi signal needs to cover the location of the machine .(if the Wi-Fi signal is too weak, it will affect the connection)

2. Configuration

- (1)Open the APP and login.

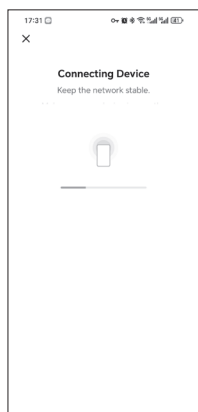

(2)Enter configuration mode

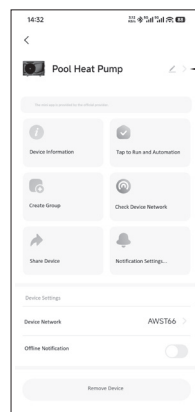

Press the "⏏" & "⏏" button at the same time for 3 seconds to enter the configuration mode, the set icon flicker. If the configuration mode times out, please restart the network configuration mode.

After confirming that the panel enters the configuration mode, select and click next to enter the configuration.

The progress of the configuration may take about 1 min. If it times out, please restart the configuration.

The configuration is successful.
