

blueplus I-FLOW PUMP

Efficient power, total control

MAXIMUM FLOW, MINIMUM ENERGY: THE NEW STANDARD IN PUMP PERFORMANCE

The **blueplus I-flow** is a high-capacity, technologically advanced pump designed to provide an optimal balance between energy efficiency, hydraulic performance, and durability, delivering up to 90% savings compared to a conventional pump.

Its advanced design redefines the technological standard for in-ground pools and spas of any size.

Equipped with a carefully balanced, high-efficiency impeller optimized through simulation to maximize flow while reducing energy consumption, the **blueplus I-flow** operates at lower revolutions per minute, decreasing energy use without compromising performance.

PROPERTIES

- **Permanent magnet motor:** High efficiency and long lifespan
- **Dual control mode:** During operation, the I-flow pump can operate in speed mode or flow mode
- **Safety lock function:** Prevents unauthorized speed adjustments
- **Extra-large strainer basket:** Increased capacity for debris, reducing maintenance frequency
- **4 programmable timers:** Tailored for daily operating cycles
- **Optional external control:** Compatible with automation systems
- **Touchscreen:** Intuitive and user-friendly interface
- **Ultra-quiet operation:** Only 40 dB, ideal for residential environments
- **Mobile app control:** Remote management via any smart device

ENERGY SAVING

COST-EFFECTIVE

EASY OPERATION AND MAINTENANCE

EASY INSTALLATION

QUIET OPERATION

3 YEAR WARRANTY

LINKABLE WITH
blueplus

Large basket with extra capacity

4 timers for daily operation

App control

Safety lock function

Comes **standard with a data cable** for easy installation and reliable connectivity.

TECHNICAL PROPERTIES
