

BLUEPLUS UV-C TITAN

ADVANTAGES & FUNCTIONS OF THE BLUEPLUS UV-C TITAN 40W/80W/120W AMALGAAM

OPERATION

The **blueplus** UV-C Titan ensures **crystal-clear water**. The sophisticated design and high-quality materials result in high UV-C radiation with a wavelength of exactly 253.7 nm. The high irradiation dose kills all bacteria, viruses and also fungi, therefore providing clear and clean water. This allows any added chemicals (e.g. chlorine) to be reduced by up to 80%, ensuring more natural, healthy water!

Thanks to the extra-wide **DUPLEX housing**, the water passed through is in contact with the UV-C radiation for an extra long time. This wide housing also ensures an **extremely minimal pressure loss during water passage**.

The casing is polished on the inside so that hardly any dirt can adhere to the walls. All this ensures that the **effectiveness** of the UV-C radiation is **increased by another 35%**.

Thanks to its intelligent electronics, the device indicates in time when the lamp no longer produces enough radiation and thus needs to be replaced. So you have a perfectly functioning device at all times!

B+ **bluematic**

It's a match! **blueplus** UV-C can easily be combined with the **bluematic** system. Log in via the app, retrieve your values, and adjust them as needed.

BENEFITS

- Kills mold, bacteria, and algae
- Reduces chlorine and other chemicals by up to 80%
- Energy-efficient and environmentally friendly
- Extra-large reactor for extended contact time
- 35% more UV-C yield through reflection
- UV-C lamp lifespan: 12,000 hours with LED indication for replacement
- Very easy installation
- 2-year warranty
