

The most intelligent robot for every pool

TECHNICAL PROPERTIES

DESCRIPTION	ROB-i 2
Cleaning	Bottom, wall and waterline
Max bath size	12 x 6 m
Cleaning cycle	bottom only = 1.5 h / bottom, wall and waterline = 2.5 h
Cable length	18 m
Access to filtration system	Top access
Technology	3 motors + iAqualink (start-stop / mode selection / errors) + cycle time adjustment, remote control and time adjustment + rear brush
Type of filtration	Basket 4 l with double filtration
Trolley	Optional
Weight	8 kg
Warranty	2 + 1 year (when registering via the app)

REF	TYPE
07057003	blueplus ROB-i 2
07057005	Trolley ROB-i

DOUBLE FILTRATION

2 matching sliding filter baskets, one filter for coarse dirt (150µ) and then a filter for fine dirt (60µ). The water is thus pre-filtered to allow finer filtration during the 2nd filtration. This combination of 2 filters therefore offers a larger filtering surface, preventing clogging

EXTREMELY LIGHT

Very user-friendly, easy to handle and light to remove from the water. With lift system for robots with iAqualink (type 2)

STRONG SUCTION

Due to spiral-shaped augers and very wide suction nozzle this robot picks up debris much more efficiently

VERY POWERFUL

Due to its 3 powerful motors; 2 for the drive and 1 for suction

Trolley is sold separately.
